Product details

- A. Right eye parallax compensation wheel
- B. Focusing Wheel
- C. Right eyepiece
- D. Left eyepiece
- E. Objective Lens
- F. Objective Lens
- G. Rubber Eye cups
- H. Strap hole
- I. Eyepieces Cover

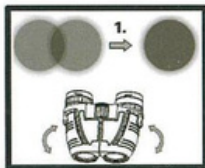

How to use

1.Rotate / Pull down the rubber eye cups:

According to your need: Rotate the rubber eye cups (Not wear glasses). Pull down the rubber eye cups (wears glasses).

2.Folding the both side of the binoculars:

To achieve perfect alignment of the eyes and the eyepiece (C&D) openings, Folding the both side of the binoculars according to your pupil distance until you have a single clear field of view.

3.Adjust the focusing wheel:

Open your eyes and aim at the eyepieces (C) and (D), then cover the right objective lens (E) with your hand and rotate the focusing wheel (B) until the image in your left eye appears sharp.

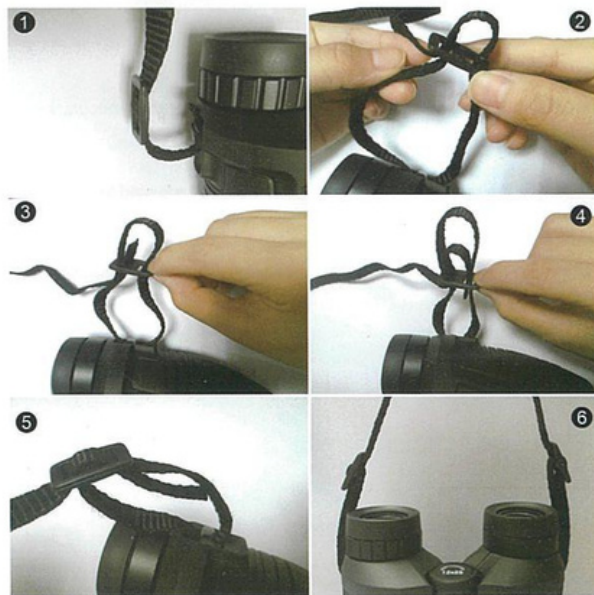

4.Rotate the Right eye parallax compensation wheel :

Now open your eyes and aim at the eyepieces (C) and (D), then cover the left objective lens (F) with your hand and rotate the right eyepiece (A) until the image is sharp in your right eye.

5.Now you can see any distance objective clearly while you rotate the wheel(B).

Frequently Asked Questions

- 1. Not night vision? This binoculars can be used in weak light night vision, not for completely dark. Only military telescopes can be used in completely dark.
- 2. Double Vision? Please folding the both side of the binoculars according to your pupil distance.
(Maybe the pupil distance of the binoculars is not adjusted to the proper position)
- 3. Do not work? First, please check whether the focus wheel is damaged or not.
Second, please using the correct eyepiece. (C and D).
If it still can not work, you can contact our customer service team.
- 4. Have shadow in the image edge?
Rotate the rubber eye cups (Not wear glasses),
Pull down the rubber eye cups (wears glasses)
(Keep the eye and eyepieces at an appropriate exit pupil distance to ensure a complete and clear viewing.)

5.Can't see anything/the object see farther

Pls confirm use the eyepieces.

If you use with the objective lens by mistake, you will feel the object see farther.

Tips

- 1.The left eyepiece lens (D) can not be rotated.
- 2.The right eyepiece lens(C) can be rotated for adjusting eyesight if your left and right eyesight is different.
- 3.When rotating the Rubber Eye cups(G), pls rotate it gently.
- 4.If you wear glasses, please twist down the Rubber Eye cups(G), this will reduce the distance between the eyepiece and the eyes, providing an improved field of view.

How to protect

- 1. Never attempt to clean the binoculars internally or try to take it apart.
- 2. Always store your binocular in the case when not in use.
- 3. When wiping the lens, use a soft lint-less cloth.
- 4. To remove any remaining dirt or smudges. Add one or two drops of isopropyl alcohol to the cloth.
- 5. Store you binocular in a moisture-free area.

Caution

Never use binoculars to view the sun.

Using binoculars to observing the sun or being in close proximity to the sun will damage your eyes. This injury is usually painless but dangerous. For preventing this accidents, children should be told by parents for this warning before using it.

WARRANTY:
